

## About us

**Together Drug & Alcohol Service provides services across Devon for adults who wish to address their drug and/or alcohol use. We are committed to:**

### Person centred support

Our service responds to what is most important to each individual, building on people's strengths and the things which interest them.

### No door being the wrong door

We make sure there are many different ways for people to use our service when and where it is needed across Devon and online.

### Collaborating with other organisations

We work closely with other organisations to pool collective local knowledge, skills and resources. We will make a step-change in simplifying the different services people use and improving the system.

### A family and community focus

We understand that people make changes where they are, in their families and the communities where they live. We will support people to make these connections.

### Working with people rather than for people

Individuals know what will best support them to make changes so it's important to us that people using our services are involved in designing and developing new approaches.

### Recognising trauma

Many people who have difficulties with alcohol and drugs have been affected by experiences of trauma. We will work in a way which recognises this and gives the right support.
