

PHARMACY FIRST TRAINING- HANDS ON

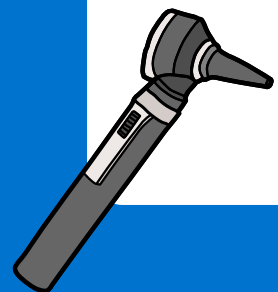

We have an exciting offer for pharmacists working in Cornwall, Devon and Somerset to sign up to a FREE practical training session in one of three locations during the month of February.

The training will provide a 1 hour 45 minute face to face practical session, where you will be able to practice and experience ear and throat assessments under the guidance of an experienced trainer. There will be the opportunities to practice using an otoscope and to undertake a throat assessment; identifying red flags in the consultation. Book now and take advantage of this offer to refine your skills in a supportive environment, preparing for the challenges of the new services.

Part of the package that is being provided will be an e-learning course to complete prior to the workshop.

There will be four 1.45 hour workshops running on each day, you only need to attend ONE of the workshops.

If possible, please bring your own otoscope to practice with.

Training Delivered by ECG Healthcare

South west LPC locations...
Cornwall, Devon, Somerset

When can i attend?
