

Community Pharmacist Independent Prescribers

TEACH AND TREAT

The Devon Teach and Treat pilot aims to support community pharmacists from across the county to achieve their IP qualification. We help to facilitate the supervised practice element of the course by providing access to suitable supervisors and clinical environment.

The expression of interest form is currently still open and has been extended to 13/12/24.

You can access it [here](#).

CLINICAL SKILLS TEACHING

We have some clinical skills sessions scheduled which may be of interest to you...

- history taking and consultation
- resp examination
- cardio examination
- hypertension
- ENT
- dermatology

You can see more details and book to attend [here](#).

DPP AND SUPERVISOR TRAINING

There are plenty of resources you can access to become a DPP or education supervisor.

- [ProPharmace](#) offers courses for both
- [Health and Education Cooperative](#) has an online DPP prep course
- [E-learning for Health](#) has a training course for Pharmacy Educational Supervisors

All of these courses are free to access.

ONLINE FORUM

We do have a workspace on the FutureNHS platform. This [workspace](#) is for anyone interested in the development of independent prescribing within community pharmacy.

OPEN SURVEY

We have also been thinking more broadly about the clinical governance required to support safe prescribing in community pharmacy. We're thinking online forums, face-to-face meetings, newsletters, updates, journal club etc.

We would love to know what you feel would benefit you the most to support your individual clinical governance.

You can access that survey [here](#).
